

# Jacky Liu

Los Angeles, CA | tiaol@uci.edu | linkedin.com/in/jacky-liu-tiao | j-liuu.github.io

## EDUCATION

### University of Southern California, Viterbi School of Engineering

Master of Science, Computer Science (Game Development)

Fall 2026

Los Angeles, CA

### University of California, Irvine

Bachelor of Science, Game Design and Interactive Media

June 2026

Irvine, CA

## EXPERIENCE

### UCI Digital Learning Lab

June 2026 – August 2026

Research Fellow & Lead Game Designer, Computing and AI for All

Irvine, CA

- Led game design for *Science Inquiry Studio*, an NSF-supported browser platform combining grades 6–8 science simulations, AI-guided inquiry, and teacher-facing learning data.
- Translated California NGSS content and educator feedback into scaffolded levels, clearer interfaces, reusable activity packs, and classroom usability protocols.

### Coding Mind Academy

2025 – 2026

Coding Instructor

Irvine, CA

- Led project-based K–12 programming classes, developed lesson plans, tracked progress, and adapted debugging support to students' skill levels and learning needs.

### Code Ninjas

January 2023 – March 2024

Game Development Instructor

Irvine, CA

- Taught programming and game-development concepts through hands-on projects, guiding students through design, debugging, iteration, and individualized technical challenges.

### UCI Games+Learning+Society (GLS) Center

May 2023 – July 2023

Research Assistant

Irvine, CA

- Researched the socioeconomic impact of games and game-related technologies for a Tencent-funded study; curated and synthesized scholarly sources for the research team.
- Supported Unity-based game research and prototyping while documenting findings for continued development.

## SELECTED PROJECTS

### Stealth Project – 3D Lead

June 2026 – Present

- Lead and manage the art department for an in-development stealth game; create procedural Unity environment assets and systems for trees and rock formations while coordinating 3D asset production.

### Robert's Mad Dash – Lead 3D & Technical Artist

Unity, Blender, Shader Graph, HLSL

- Built node-based toon and halftone shaders, resolved hard-surface outline artifacts with targeted HLSL, and created lighting, spark, and motion-trail effects for a stylized skateboarding game.
- Led 3D pipeline support by reviewing UVs and topology and optimizing environment meshes with ProBuilder geometry tools.

### Time Heist – Lead 3D Artist

Unity, Blender, Level Design

- Created most environment models for a stealth time-travel puzzle game and contributed to level layout, spatial flow, and environmental puzzle design across a 27+ week capstone production.

### G-NOME – Level Designer & 3D Artist

Unity, Blender, Multiplayer FPS

- Designed ability-aware arena routes, sightlines, and fast re-entry paths and produced low-poly environment assets for a floating-island multiplayer shooter showcased at Z3 Expo 2025.

### p5.js Flower – Interactive Developer

JavaScript, p5.js, Procedural 3D

- Generated an interactive 3D flower with polar coordinates, trigonometric and parametric equations, power-controlled petal curvature, exponential bloom shaping, and procedural bump mapping.

## TECHNICAL SKILLS

**Programming** JavaScript, Python, C++, C#, HLSL, HTML5, CSS3

**Game / 3D** Unity, Unreal Engine 5, Godot, Blender, Shader Graph, ProBuilder
